

Presentations

3 minutes, brief feedback afterwards

Feedback focus

- is the topic clear?
- are the user/software perspective thought through well enough to start coding?
- is the project manageable, well-focused?
- are there unforeseen obstacles?
- can you think of more efficient design choices?
- (are the possible extensions worthwhile?)

Beneficial feedback

- ask questions for clarification
- give constructive / encouraging feedback
- keep it personal ("I think the project could benefit..., because I feel that...")
- try to make it very specific
- compliments on great ideas are helpful too

Today

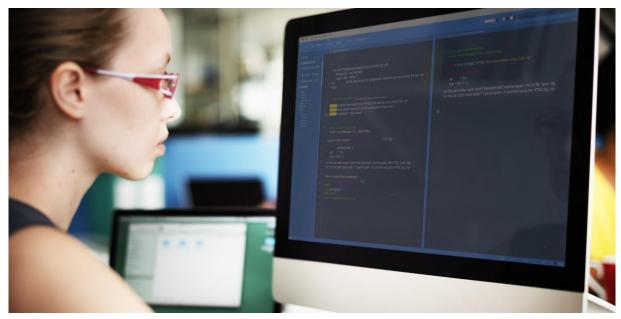

Programming Superpowers

- 1. Independence
- 2. Coding style
- 3. Documentation
- 4. Version control
- 5. Testing
- 6. Having fun

(today, maybe next week)

Independence Free Solo

https://youtu.be/Phl82D57P58

Independence

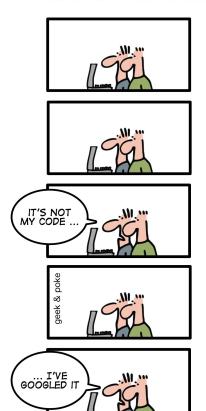

Resources / documentation

- R: ?package; vignette("package")
- Python: <u>documentation</u> (2 vs 3)
- Presentation: <u>help resources</u>

Search

- How to Google effectively (!)
- Stack Overflow
 - [tag]: [r][python][python-2.7][python-3.x][package]
 - -exclude
 - "exact phrase"

CODERS' TOP EXCUSES

Independence

Ask

- your peers
- <u>stackoverflow</u> for most languages (read tips in link)
- <u>neurobs</u> for presentation
- provide a <u>reproducible example</u> (e.g., <u>reprex</u>)
- 2 hours supervision

```
try position_jitter() - Jimbou Apr 26 at 8:42

Is it correct that position_jitter() can only add random noise? In my case it should not be random: based on the value of a second variable, in some cases it should be nudged upwards, and in other cases nudged downwards. - Alexander Apr 26 at 8:54 *

1 Then please provide reproducible data using dput() for instance. - Jimbou Apr 26 at 8:57

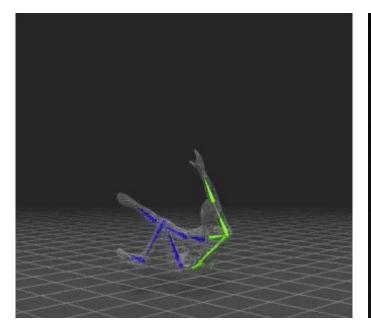

1 Your Q misses a reproducable example, so it's hard to help. However, here's a guess: If you want the nudging to be controlled by the variable v , you could try position_nudge(y = ifelse(dataframe$v == "upwards", +0.05, -0.05)) - Jeremy Apr 26 at 9:05 *

Thank you Jeremy, that did the trick. - Alexander Apr 26 at 9:24

Wrt the reproducable data, I very much do support using such an example, but I didn't readily see how it would help here. Will add it. - Alexander Apr 26 at 9:49
```

Take-away: (1) research your question (2) make it specific (3) most problems have been solved before: find and learn (4) if not: make sure others will learn from it

Coding Style Efficiency

```

Coding Style

```
//Child Component / Profile (Functional Component)
const Profile = (props) => {
 const classes = props.selected ? 'bold' : '';
 return (
  <i className="fa fa-user"></i> { props.user.name }
```

Coding Style

Principles

- hierarchy: use tabs to represent internal structure
- modularity & chunking: make reusable code that serves a single purpose
- consistency: choose a style and stick to it
- framing: comment your code

Reasons

- less mistakes
- easier to spot mistakes
- easier collaboration
- easier for others to help you
- more efficient in the long run
- open science

Coding Style: Style Guides

R

Hadley Wickham, Google, formatR

NetLogo

Official style

Python

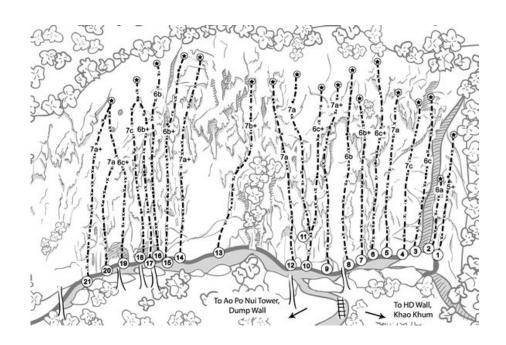

• PEP-8, PEP-8 tutorial

Presentation

Ask Jasper for tips

Take-away: use a consistent style that matches a preferred style in your language

Documentation Topo

Package 'climbeR'

November 19, 2016

Title Calculate Average Minimal Depth of a Maximal Subtree for 'ranger' Package Forests

Version 0.0.1

Description Calculates first, and second order, average minimal depth of a maximal subtree for a forest object produced by the R 'ranger' package. This variable importance metric is implemented as described in Ishwaran et. al. (`High-Dimensional Variable Selection for Survival Data", March 2010, <doi:10.1198/jasa.2009.tm08622>).

Depends R (>= 3.3.2)

License MIT + file LICENSE

Imports ggplot2, grDevices, graphics

Suggests survival (>= 2.38-1), ranger, knitr, rmarkdown, testthat, dplyr

RoxygenNote 5.0.1

VignetteBuilder knitr

NeedsCompilation no

Documentation

Three reasons

Because you forget

Because you want others to use it

Because you forget

Documentation (code-intensive)

Commenting

Literate computing

r

python

presentation

; <u>netlogo</u>

R Notebook (R)

<u>Jupyter Notebook</u> (over 40 languages)

Take-away: comment your code extensively

Documentation (text-intensive)

Literate programming Manual

R vignette: try vignette("dplyr")

R documentation

(<u>more</u> on literate programming and computing) <u>Python documentation</u>

Look through some manuals

And you can build a website...

Take-away: (1) be aware of different ways to document your code, and the different goals of documentation (2) imitate the documentation style that is preferred in your language

Version Control

Reasons

Document the *changes*

(Re)store versions

Compare versions

Automatic backup

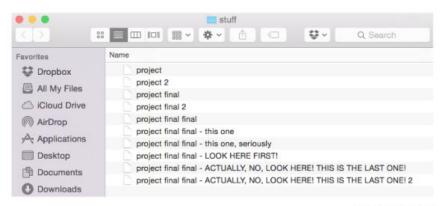

Collaboration

GitHub

Online service for <u>Git</u> (version control software)

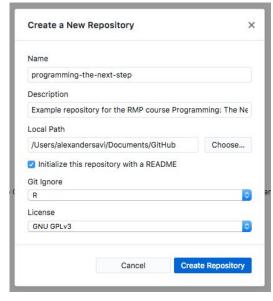

Many additional features

Let's check it out

Version Control: GitHub Desktop

Create repository

What is **Git Ignore**?

Commit

Publish

Publish Repository		>
GitHub.com		Enterprise
Name		
programming-the-next-ste	р	
Description		
Example repository for the	RMP course Progr	ramming: The Next Step
Keep this code private		
Organization		
None		0

Version Control: Become a Pro

Git

- Use it from the terminal (guide)
- Use it <u>from the terminal</u> (tutorial)
- Read <u>the book</u>
- Learn about workflows

GitHub

- Use it on GitHub.com (guide)
- Use it <u>from the terminal</u> (tutorial)
- Work with GitHub Desktop

Take-away: get some experience with setting up a Git/GitHub workflow, and get familiar with Git basics

CODERS AND BOSSES JEP. I ALREADY FINISHED THE ESTIMATION PUSHED IT INTO THE GIT REPO. JUST PULL IT! OK OK. I'LL EMAIL IT TO YOU BE PATIENT! HE DOESN'T KNOW BETTER

A problem has been detected and Windows has been shut down to prevent damage to your computer.

UNMOUNTABLE_BOOT_VOLUME

If this is the first time you've seen this error screen, restart your computer. If this screen appears again, follow these steps:

Check to make sure any new hardware or software is properly installed. If this is a new installation, ask your hardware or software manufacturer for any Windows updates you might need.

If problems continue, disable or remove any newly installed hardware or software. Disable BIOS memory options such as caching or shadowing. If you need to use Safe Mode to remove or disable components, restart your computer, press F8 to select Advanced Startup Options, and then select Safe Mode.

Technical Information:

*** STOP: 0x000000ED (0x80F128D0, 0xc000009c, 0x00000000, 0x00000000)

Unit Testing

- 1. Work with small units (e.g, a function).
- 2. What should the unit do?
- Create the unit.
- 4. Create a test for the unit.

Compare with external ground truth:

```
TestCorrelation <- function(cor1, cor2) {
   if (cor1 == cor2) {
      print("TestCorrelation: PASSED")
   } else {
      cat("TestCorrelation: FAILED", c(cor1, cor2), "\n", sep = " ")
   }
}
TestCorrelation(1, 1)
TestCorrelation(1, 2)
# TestCorrelation(CalculateCorrelation(var1, var2), cor(var1, var2))
# test dataset
x <- c(1,2,3,4,5,6,7,8)
y <- c(2,4,5,6,9,12,32,18)
TestCorrelation(CalculateCorrelation(x, y), cor(x, y))</pre>
```

Or verify each step:

- use print() in a loop
- verify a single case, before going over all cases
- use set.seed() to see whether things change when they shouldn't

Error Provision

First try to break your code

```
> what_now <- function(i) {
+    sample(c("eat", "sleep", "code"), i)
+ }
> what_now("repeat")
Error in sample.int(length(x), size, replace, prob) :
    vector size cannot be NA/NaN
In addition: Warning message:
In sample.int(length(x), size, replace, prob) :
```

Then provide meaningful details

```
> sum("mer")
Error in sum("mer") : invalid 'type' (character) of argument
```

Debugging

RStudio

```
> what_now <- function(i) {
+    sample(c("eat", "sleep", "code"), i)
+ }
> what_now("repeat")
Error in sample.int(length(x), size, replace, prob) :
    vector size cannot be NA/NaN
In addition: Warning message:
In sample.int(length(x), size, replace, prob) :
    Error in sample.int(length(x), size, replace, prob) :
    vector size cannot be NA/NaN
```

- Show Traceback
- Rerun with Debug

Alpha Testing

Think your program is unbreakable? Let others have a try!

We'll do it in class!

Bug report

For each bug specify

- the steps to reproduce
 - description of what went wrong (user perspective)
 - when relevant: systems specs where error occurred (OS, browser)
- what you expected to see
- what you saw instead
 - provide a screenshot

Pro tip: GitHub uses <u>Issues</u> for this

Having Fun

Hide an easter egg

Try programmer humor

Take a break

Learn to juggle

Sit together

Break your neighbor's code

Presentation

Extend shared presentation.

Use 2 slides (show, don't tell):

1. Superpowers

- a. Version control: how do you keep track of changes/versions?
- b. Coding style: what's your style?
- c. Documentation: how do you make sure you and others can understand your code?

2. Progress

- a. Past: what have you done so far?
- b. Future: what's next?

Present next week in 2 minutes.

Questions?

Happy coding!
